## **DETAILED ACTION**

### **Response to Amendment**

In view of Applicant's Amendment received 9 July 2007, amendments to the claims have been entered. Claims 1 and 4 are canceled. Claims 2, 3 and 5-19 are pending.

Upon further consideration it has come to the examiner's attention that the instant application involves different patentably distinct species and there is a serious burden on the examiner if each species were to continue to be prosecuted in the same application. In as much as a restriction requirement is appropriate at any time before final whenever the need develops (see MPEP 811), a provisional election requirement as set forth below is now necessary.

Restriction required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action to elect a single invention to which the claims must be restricted.

This application contains claims directed to the following patentably distinct species of the claimed invention: Group 1, Figs. 2-8; Group 2, Figs. 9-12; Group 3, Fig. 13; Group 4, Fig. 14; Group 5, Fig. 15; Group 6, Figs. 16-19; and Group 7, Figs. 20-21; Group 8, Fig. 22. Fig. 1 is applicable to all the Groups 1 through 8.

**Claims 2, 3, and 5-9**, drawn to Group 1, a member-joining device having first and second bridge members spanning between the opposing walls of the first and second members. It is considered that the bridge members as a first "special technical feature".

**Claims 10-19**, drawn to Group 2, a member-joining device having a position determining means for projecting in a predetermined position of the first member. It is considered that the position determining means members as a second "special technical feature".

The inventions of Groups 1 and 2 as mentioned above do not related to as single general inventive concept under PCVT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features, and are not so linked, related or shared any technical

Art Unit: 3679

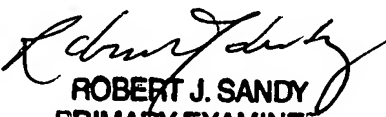

features or technical relationship so as to form a single general inventive concept as required under PCT Rule 13.1. The groups of claims as identified above are distinct to each other and they are different inventions.

*Conclusion*
